Family Similarities

Tapas was looking through the family album. He was surprised to see an old photograph of a boy who looked exactly like him. His mother told him that it was his father's photograph when he was eight years old.

How could two people look so much alike? It happens! Members of a family often resemble each other. Sometimes the resemblance is very little. It can be seen only in the colour of the skin, shape of the nose, forehead, etc. But sometimes the features of a child are very much like the mother, father, sister or brother.

Most tall parents have tall children and short parents have short children. But many a times, both parents may be tall but their child may be short.

In some cases, the type and the colour of hair of the children are similar to the hair of either the father or the mother. If the father has brown hair then one child may have brown hair. Many children resemble their grandparents, uncles, aunts or cousins. Sometimes a girl may not look like her mother but she may walk or talk like her mother.

Family members do not only look similar but sometimes they may have even similar voices. You may not be able to make out whether you are talking to the mother or the daughter on the phone. The features, colour of skin, type of hair, habits, likes and dislikes of family members may be similar or different.

Identical twins

Many twins look different but some twins look exactly alike. They are known as ‘**identical twins**’. Sometimes even the parents of the identical twins find it difficult to tell who is who!

Do You Know?

Some senior members of family may wear spectacles or hearing aid, if their sight or hearing becomes weak. Some children have weak eyes or hearing, right from childhood.

In some families, the food habits or style of dressing of some of the members are similar. Some members of a family may not like some dish or the whole family may be fond of *kheer* (rice pudding). In the same manner, many children follow the occupations of their parents or relatives like the son/daughter of a sports person wants to follow the same sport. The children of singers, artists, actors, builders, goldsmiths or doctors may follow the footsteps of their parents or they may want to take up some other work.
